

The Kimberley School

**Activities and
Study Support
Programme**

2009 - 2010

INTRODUCTION

This booklet outlines some of the exciting extra-curricular and study support opportunities on offer to students at The Kimberley School this term.

Of course, there are other activities which take place on a one-off basis such as theatre trips and field work. Some of these are detailed in the school calendar and on the website/VLE.

The booklet contains some information about support available for students with their studies. Many teachers and departments offer study support informally at lunchtime and after school. Later in the year, coursework sessions and revision workshops will be offered to Year 11. The teacher in charge will be able to give you more information.

School is about making the most of opportunities. It would be great to think that all students will aim to be involved in at least one school activity.

Mr. C. Teal
Headteacher
