

# POLICE NAMED POOR POOR POOR!

Police forces all over the UK have been ranked recently. Nottinghamshire Police Force was ranked one of the worst in the nation

Forty-six forces were rated on Local Confidence, Protection from harm and local policing. The results came back as :  
Local Policing : Poor  
Protection: Poor  
Confidence: Poor.  
Year 7s and 8s Said that they feel the police are poor/Fair in protection from Local crime and serious harm and that they think the police will improve in the next few years.

We spoke to the media office at the Nottingham police force and they told us that after finding out their ranking was so low and that “obviously not a nice thing to hear”. However a sergeant told us that it was “business as usual and to improve they are going to listen to the public and the public police more.

This could mean that the police will bring back some of the confidence for the public but still have some room to improve. We hope that when the next survey is made the results wont come back as only poor poor poor.
