GCSE Accelerating Progress Evening

Modern Technologies

Using Apps and interactive websites to support revision

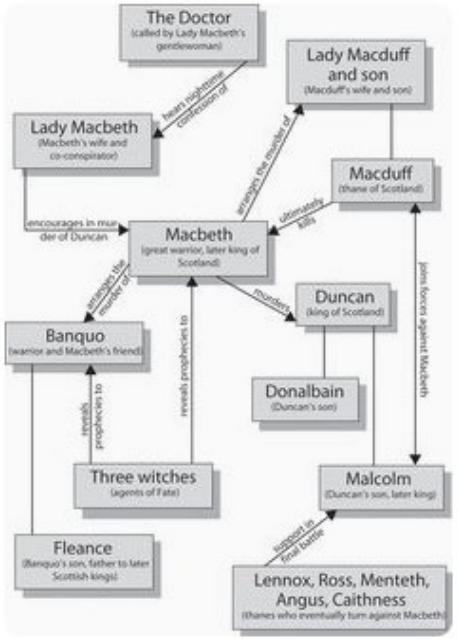
Good for:
Visuals & Overviews

Pinterest and Padlet allow you to collect and ‘scrapbook’ ideas

They are filled with revision notes, diagrams and visuals shared by schools and learners

Tips & Tricks

- Limit time to avoid ‘drift’
- Know what you’re searching for
- Be specific



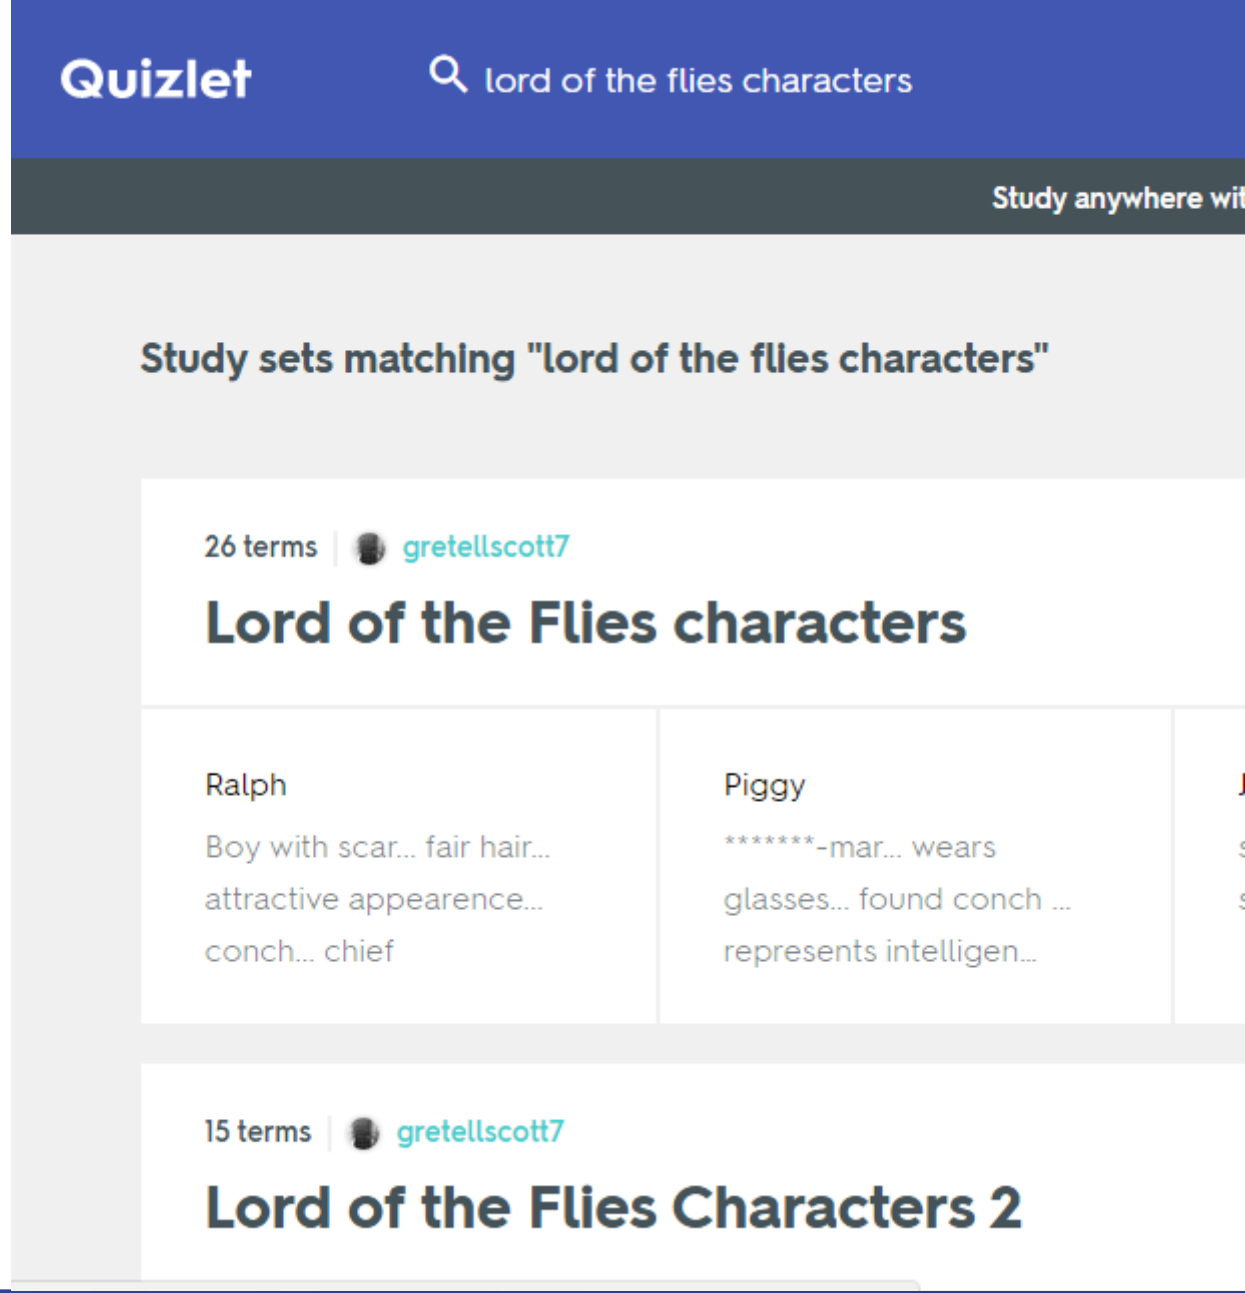
Good for:
Subject Knowledge

Quizlet and Seneca* allow you to revise and test subject knowledge. Quizlet, for example, contains pre-made flashcards, multiple choice quizzes and true/false style questions.

There are a plethora of Apps out there that cover a wide range of topics.

Tips & Tricks

- Find one or two Apps that cover multiple subjects.
- Check the content is right for your course.



Why are these useful?

These are all great for developing subject knowledge and practicing recall. As a result, using such websites and Apps are good for highlighting gaps in subject knowledge. This means they should be used as a starting point from which you can dig deeper.

They are convenient. Revision and practice can be done on a tablet or smart phone and their design allows you to 'dip in and out' when you have the time.

The interactive nature means they provide instant feedback on quizzes and tests.
